Management Discussion of Fund Performance

Investment Objective and Strategies

Chou Europe Fund's (the "Fund") objective is to provide long-term growth of capital by investing primarily in the equity securities of European businesses considered by Chou Associates Management Inc. (the "Manager") to be undervalued. The Fund may also invest in securities other than equities and in businesses located outside of Europe. The Fund's investments may include common and preferred shares, convertible debentures, options, warrants, government and corporate bonds and short-term indebtedness. The Fund may also use derivatives such as, but not limited to, futures, options, swaps and forward contracts to gain exposure to securities and asset classes consistent with the objectives of the Fund, and to hedge portfolio exposure against losses from foreign currency and domestic currency exposure and changes in securities prices.

The Fund's investment strategy follows a strong discipline with regard to the prices paid to acquire portfolio investments. The level of investment in a particular entity's securities is generally commensurate with the current price of the company's securities in relation to the Manager's assessment of such entity's intrinsic value as determined by various factors. This approach is designed to provide an extra margin of safety, which in turn, serves to reduce the Fund's overall portfolio risk.

Risk

The risks of investing in the Fund are disclosed in the Fund's most recently filed Simplified Prospectus which can be found on the Fund's website at www.choufunds.com and SEDAR+ at www.sedarplus.ca.

During the period ended December 31, 2023, there were no material changes that affected the Fund's overall level of risk.

Market Review

In 2023, the market, as measured by the MSCI AC Europe, gained 20.80% in U.S. dollars. For most of the year, central banks across the globe continued raising interest rates as inflation continued to be a problem. Later in the year, inflation began to wane and central banks paused rate hikes. The European economy avoided recession and corporate profits were better than expected. Later in the year investors became convinced the rate hike cycle was over and rate cuts were around the corner. This led to a strong market rally in the last two months of the year.

Results of Operations

For the year ended December 31, 2023, the Fund increased by 39.6% for Series A units and 39.6% for Series F units, after fees and expenses, while the MSCI AC Europe Total Return Index increased by 17.9% in Canadian dollars. In U.S. dollars, the Fund increased by 42.6% for Series A units and 42.6% for Series F units, while the MSCI AC Europe Total Return Index increased by 20.8%.

The major advancers in 2023 were the equity holdings of Wizz Air Holdings Plc and Stellantis NV.

The largest decliners in 2023 were the equity holdings of Liberty Global PLC and Prosus NV.

The euro depreciated against the Canadian currency during the period, which contributed negatively to the performance of the Fund.

CHOU EUROPE FUND

Portfolio Update

During the period, the Fund reduced its holdings in Ryanair Holdings PLC. The Fund eliminated its holdings in JET2 PLC, Rolls-Royce Holdings PLC and Cairo Mezz PLC.

The Fund also had no covered call options in its portfolio as at December 31, 2023.

The Fund received \$248 in income from its securities lending program in 2023.

The Fund did not enter into any forward currency contracts for pounds sterling or euros in 2023.

The Fund's net redemptions for the year ended December 31, 2023 were approximately \$218,417 for Series A units and net subscriptions of approximately \$112,545 for Series F units. Included in net redemptions/net subscriptions are subscriptions, redemptions and transfers in/out. Out of the net subscriptions for Series F units, \$22,872 was switched from Series A units following the OEO trailer ban. The Fund's average month-end cash position for the period was 14.7% of the Fund's net assets.

Recent Developments

The ongoing Russian invasion of Ukraine and COVID-19 pandemic have continued to disrupt businesses around the world, adding volatility to both domestic and international markets. While governments and central banks have maintained their support of the economy through monetary and fiscal policies, the health of the economy remains unclear at this time. Based on this increased uncertainty, we expect the performance of the Fund's portfolio to be affected to some degree in the near term.

Related Party Transactions

The Manager manages the overall business of the Fund, including selection of the securities in the Fund's portfolio, and promoting the sale of the Fund's units.

The Manager is also the trustee of the Fund. Investors receive units of a trust when they invest in the Fund. The Manager, as trustee, holds the actual title to the property in the Fund, the cash and portfolio securities, on behalf of the Fund's investors.

The Manager, its officers and directors invest in units of the Fund from time to time in the normal course of business. As of December 31, 2023, the Manager, its officers and directors hold 6.8% of the Fund. All transactions with the Manager are carried out at the Fund's net asset value as at the transaction date.

During the year ended December 31, 2023, there were no transactions with related parties except in the capacities and instances set out above.

The Manager waived the management fees for the Chou Europe Fund beginning in August 2022 for an indefinite period. No fees were charged for the Chou Europe Fund in 2023.

⁽¹⁾ This information is derived from the Fund's audited annual financial statements.

⁽²⁾ Net assets and distributions are based on the actual number of redeemable units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of redeemable units outstanding over the financial year.

⁽³⁾ Distributions were reinvested in additional units of the Fund or paid in cash upon request.

⁽⁴⁾ This information is provided as at the year end shown and is rounded to the nearest thousand.

⁽⁵⁾ Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated year and is expressed as an annualized percentage of weekly average net asset value during the year. The Manager may, at its discretion, waive or absorb certain operating expenses. MER includes the waiver or absorption by the Manager of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by the Manager.

⁽⁶⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of weekly average net asset value during the year.

⁽⁷⁾ The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the financial year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

CHOU EUROPE FUND

Management Fees

The Manager is entitled to an investment management fee calculated daily as a percentage of the market value of the net assets equal to 1.5% per annum for Series A units and 1.0% per annum for Series F units, payable monthly. The Manager pays 50 basis points per year trailer fees to dealers out of management fees for Series A units. There is no trailer fee paid out for Series F units.

Past Performance

General

The following charts and tables show the Fund's past performance. Rates of return are historical total returns that include changes in unit prices and assume the reinvestment of all distributions. These returns do not take into account any sales charges, redemption fees, other optional expenses or income taxes that the Fund's investors have to pay and which could reduce these returns. The Fund's past performance does not necessarily indicate its future performance.

Year-by-Year Returns

The following bar charts show the annual performance for each of the Series A and Series F units of the Fund for each of the years shown. Each chart shows, in percentage terms, how an investment on January 1 would have increased or decreased by December 31 for each of the years, and how the performance of the Fund varied from year to year.
