Management Discussion of Fund Performance

Investment Objective and Strategies

Chou Europe Fund's (the "Fund") objective is to provide long-term growth of capital by investing primarily in equity securities of European businesses considered by Chou Associates Management Inc. (the "Manager") to be undervalued. The Fund may also invest in securities other than equities and in businesses located outside of Europe. The Fund's investments may include common and preferred shares, convertible debentures, options, warrants, government and corporate bonds, and short-term indebtedness.

The Fund's investment strategy follows a strong discipline with regard to the prices paid to acquire portfolio investments. The level of investments in a particular entity's securities is generally commensurate with the current price of the company's securities in relation to the Manager's assessment of such entity's intrinsic value as determined by various factors. This approach is designed to provide an extra margin of safety, which in turn, serves to reduce the Fund's overall portfolio risk.

Risk

The risks of investing in the Fund are disclosed in the Fund's most recently filed Simplified Prospectus which can be found on the Fund's website at www.choufunds.com and SEDAR at www.sedar.com.

During the year ended December 31, 2018, there were no material changes that affected the Fund's overall level of risk.

Market Review

For the year 2018, European equities ended the year in negative territory. Political challenges as well as growth concerns weighed heavily on European equities. Uncertainty over the UK's Brexit negotiations stoked investor fears across the region. Other geopolitical factors included France's protests over President Emmanuel Macron's reforms and the Italian government's dispute with the European commission over its budget.

Against this political backdrop and along with some softening economic growth in the region, many European benchmarks indices were down double-digits overall for the year.

Results of Operations

For the year ended December 31, 2018, the Fund decreased 9.9% for Series A units and 9.4% for Series F units, after fees and expenses, while the MSCI AC Europe Total Return Index decreased 6.8% in Canadian dollars. In U.S. dollars, the Fund decreased 17.1% for Series A units and 16.6% for Series F units, while the MSCI AC Europe Total Return Index decreased 14.3%.

The main negative contributors to the Fund's performance in 2018 were equity holdings of Intralot SA, Eurobank Ergasias SA, Ryanair Holdings PLC, and Bank of Ireland.

The only positive contributor to the Fund in 2018 was Sanofi. The Euro appreciated slightly against the Canadian currency during the year, which also contributed positively to the performance of the Fund.

The Fund added common shares of Fiat Chrysler Automobiles to its portfolio in 2018.

The Fund reduced holdings in Eurobank Ergasias SA and exited equity positions of OTCPharm in 2018.

The Fund wrote covered call options on the common shares of Endo International PLC in 2018.

CHOU EUROPE FUND

The Fund's net redemptions for 2018 were approximately \$1,912,581 for Series A units and net purchases were approximately \$2,681,981 for Series F units. The Fund's average month-end cash position for the year was 17.8% of the Fund's net assets.

During 2018, the Fund received \$769 in income from its securities lending program.

The Fund did not enter into any forward currency contracts for pounds sterling or Euros in 2018.

Recent Developments

There have been no recent market developments of particular note, aside from the normal fluctuations of the markets that are expected to have an undue influence on the portfolio of the Fund when compared to its benchmark.

Related Party Transactions

The Manager manages the overall business of the Fund, including selection of the securities in the Fund's portfolio, and promoting the sale of the Fund's units.

The Manager is also the trustee of the Fund. Investors receive units of a trust when they invest in the Fund. The Manager, as trustee, holds actual title to the property in the Fund, the cash and portfolio securities, on behalf of the Fund's investors.

The Manager, its officers and directors invest in units of the Fund from time to time in the normal course of business. All transactions with the Manager are carried out at the Fund's net asset value as at the transaction date. As of December 31, 2018, the Manager did not hold any Series A units of the Fund.

During the year 2018, there were no transactions with related parties except in the capacities and instances set out above.

⁽¹⁾ This information is derived from the Fund's audited annual financial statements.

⁽²⁾ Net assets and distributions are based on the actual number of redeemable units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of redeemable units outstanding over the financial period.

⁽³⁾ Distributions were reinvested in additional units of the Fund or paid in cash upon request.

⁽⁴⁾ This information is provided as at year end shown and is rounded to the nearest thousand.

⁽⁵⁾ Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. The Manager may, at its discretion, waive or absorb certain operating expenses. MER includes the waiver or absorption by the Manager of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by the Manager.

⁽⁶⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of weekly average net asset value during the year.

⁽⁷⁾ The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

CHOU EUROPE FUND

Management Fees

The Manager manages the Fund. The Manager is entitled to an investment management fee calculated daily as a percentage of the market value of the net assets equal to 1.5% per annum for Series A units and 1.0% per annum for Series F units, payable monthly. The Manager pays 50 basis points per year trailer fees to dealers out of management fees for Series A units. There is no trailer fee paid out for Series F units.

Past Performance

General

The following charts and tables show the Fund's past performance. Rates of return are historical total returns that include changes in unit prices and assume the reinvestment of all distributions. These returns do not take into account any sales charges, redemption fees, other optional expenses or income taxes that the Fund's investors have to pay and which could reduce these returns. The Fund's past performance does not necessarily indicate its future performance.

Year-by-Year Returns

The following bar charts show the annual performance for each of the Series A and Series F units of the Fund for each of the years shown. Each chart shows, in percentage terms, how an investment on January 1 would have increased or decreased by December 31 for each of the years, and how the performance of the Fund varied from year to year.
