Management Discussion of Fund Performance

Investment Objective and Strategies

The Chou RRSP Fund's ("the Fund") objective is to provide long-term growth of capital by investing in equity and debt instruments of primarily Canadian businesses considered by Chou Associates Management Inc. (the "Manager") to be undervalued. The Fund may also invest in equity and debt instruments of U.S. and foreign businesses. Investments may include common and preferred shares, convertible debentures, government and corporate bonds and short-term indebtedness. The Fund may also use derivatives such as, but not limited to, futures, options, swaps and forward contracts to gain exposure to securities and asset classes consistent with the objectives of the Fund, and to hedge portfolio exposure against losses from foreign currency and domestic currency exposure and changes in securities prices.

The Fund's investment strategy follows a strong discipline with regard to the prices paid to acquire portfolio investments. The level of investment in a particular entity's securities is generally commensurate with the current price of the company's securities in relation to the Manager's assessment of such entity's intrinsic value as determined by various factors. This approach is designed to provide an extra margin of safety, which in turn, serves to reduce the Fund's overall portfolio risk.

Risk

The risks of investing in the Fund are disclosed in the Fund's most recently filed Simplified Prospectus which can be found on the Fund's website at www.choufunds.com and SEDAR+ at www.sedarplus.ca.

During the period ended December 31, 2024, there were no material changes that affected the Fund's overall level of risk.

Market Review

In 2024, the market, as measured by the S&P/TSX, gained 21.65%. The strong gains were fueled by aggressive interest rate cuts by the Bank of Canada. The Bank of Canada lowered interest rates from 5% in June to 3.25% in December as inflation moderated and concerns about a potential recession mounted with the slowing economy. Overall, corporate profit growth remained solid. Energy stocks performed well, and investors continued to show enthusiasm for technology related stocks on continued optimism around the development and application of artificial intelligence. Sticky inflation, continued geo-political instability and the potential of tariffs from the United States could potentially lead to a more volatile economic and investment environment.

Results of Operations

For the year ended December 31, 2024, the Fund decreased by 1.4% for Series A units and 0.8% for Series F units, after fees and expenses, while the S&P/TSX Total Return Index increased by 21.7% in Canadian dollars. In U.S. dollars, the Fund decreased by 9.1% for Series A units and 8.6% for Series F units, while the S&P/TSX Total Return Index increased by 11.7%.

The major advancers in 2024 were the equity holdings of Onex Corp., Methanex Corporation and Exco Resources Inc.

The largest decliners in the period were the equity holdings of Parex Resources Inc., Canfor Pulp Products Inc., Magna International Inc. and Interfor Corporation.

CHOU RRSP FUND

Portfolio Update

During the year, the Fund eliminated the common equity holdings of Bausch Health Companies Inc., CI Financial Corporation, BlackBerry Limited and the warrant of Hertz Global Holdings Inc.

The Fund initiated investments in the common equity holdings of Morguard Corporation, Trican Well Service Ltd. and Imperial Oil Limited in 2024.

The Fund had no covered call options in its portfolio as at December 31, 2024.

The Fund received \$1,145 in income from its securities lending program in 2024.

The Fund's net redemptions for the year ended December 31, 2024 were approximately \$1,765,191 for Series A units and net redemptions of approximately \$2,450,285 for Series F units. Included in net redemptions are subscriptions, redemptions and transfers in/out. Out of the net redemptions for Series F units, \$94,508 was switched from Series A units following the OEO trailer ban. The Fund's average month-end cash position for the period was 39.2% of the Fund's net assets.

Recent Developments

The resilience of the U.S. economy heightens attention on the Federal Reserve's response to inflationary pressures. China's economic slowdown and ongoing geopolitical unrest also affect the global trade and energy prices. Meanwhile, advancements in AI and technology continue to spur market sentiment despite prevailing economic uncertainty. As a result, we anticipate some impacts on the portfolio performance of the Fund in the near term.

Related Party Transactions

The Manager manages the overall business of the Fund, including selection of the securities in the Fund's portfolio, and promoting the sale of the Fund's units.

The Manager is also the trustee of the Fund. Investors receive units of a trust when they invest in the Fund. The Manager, as trustee, holds the actual title to the property in the Fund, the cash and portfolio securities, on behalf of the Fund's investors.

The Manager, its officers and directors invest in units of the Fund from time to time in the normal course of business. As of December 31, 2024, the Manager, its officers and directors hold 5.2% of the Fund. All transactions with the Manager are carried out at the Fund's net asset value as at the transaction date.

During the year ended December 31, 2024, there were no transactions with related parties except in the capacities and instances set out above.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Net assets and distributions are based on the actual number of redeemable units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of redeemable units outstanding over the financial year.

(3) Distributions were reinvested in additional units of the Fund or paid in cash upon request.

(4) This information is provided as at the year end shown and is rounded to the nearest thousand.

(5) Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated year and is expressed as an annualized percentage of weekly average net asset value during the year. The Manager may, at its discretion, waive or absorb certain operating expenses. MER includes the waiver or absorption by the Manager of certain operating expenses, while the MER before absorption shows the MER prior to operating expenses being waived or absorbed by the Manager.

(6) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of weekly average net asset value during the year.

(7) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the financial year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

CHOU RRSP FUND
